

FOR IMMEDIATE RELEASE

Probably working on something.

VISTA, USA—FEBRUARY 3 2010

THEEVE IS PROUD TO WELCOME OUR FIRST AM, JOSIAH GATLYN.

Theeve is proud to welcome Josiah Gatlyn to the team as their first Am of many to come.

Josiah has had some great coverage and his skating has certainly captured a lot of people's attention globally. Theeve is hyped to support his future in skateboarding.

"These are the best trucks I've ever ridden. I love that they come with Bones Bushings. As soon as I stepped on my board I could feel a nice bounce to it."

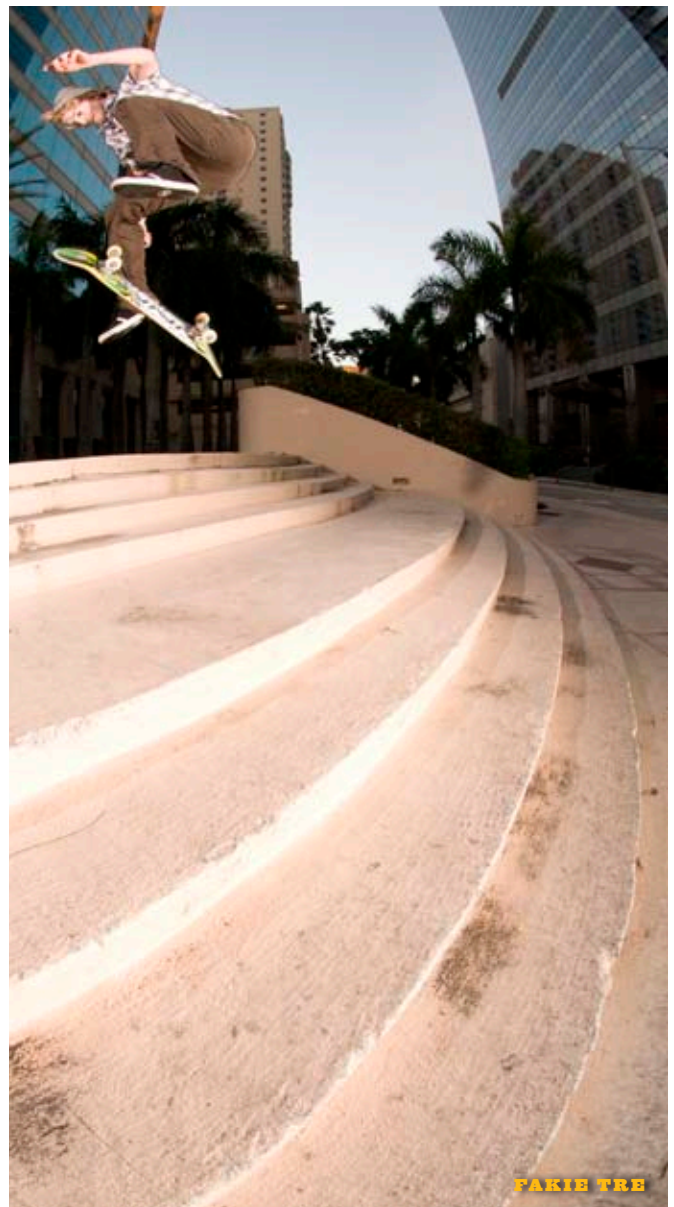

JOSIAH GATLYN

ABOUT THEEVE TRUCKS

Two and a half years ago **THEEVE** set out to design the strongest, lightest and best skating truck to date. The progression of skateboarding into big technical tricks has started to demand more from trucks than ever before. Titanium was the obvious choice when it came to taking trucks to the next level.

Titanium has the highest strength to weight ratio of any metal and is 40% lighter than steel. Theeve has used some of the best computer aided design in the world to create not only a stronger, lighter truck but a truck that probably turns the best out of any truck on the market.

With the unique Titanium alloy blend used in the casting process combined with the 6/4 Aerospace Titanium axle, you get less chance of axle bend and a 40% weight saving over traditional steel axles. Add to this the fact all Theeve trucks come standard with Bones® Hardcore Bushings™ you get probably the ultimate skateboard truck ever made.
